

Team 3 - Cards Against Humanity Mobile Game - Sprint Log for February 25th

User Story	Sprint Task	Owner(s)	Initial Est. (Hours)	Complete
			125	Y/N
As a developer I want to complete the product statement document: product statement, objectives, stakeholders and deliverables.				
	Create Documents on Google Doc	Kalena	2	y
	Complete document with appropriate information	Everyone	6	y
As a developer and student I want to set up source control (Github) and connect group.				
	Setup Repository	James		
	Those in group more familiar with github teach those who are unfamiliar (and subsequently those unfamiliar with git learn commands and subversion process)	Group	4	
As a developer I would like to be able to track my time worked on the project and know the status of tasks, due dates, and meetings.				
	Create a Google Doc with the important dates and times for the project	Kalena	1	y
	Create website (Google site) as a team project hub including creating and embedding documents, tables, due dates, and contact info.	Kalena		
	Create a flat file with the current work in Github	James	1	y
	Coordinating meeting times for the group and with the TA (email, text, etc)	Kalena	1	
	Create architecture diagram depicting how each part of our project communicates with each other.	Eric	1	y
As a developer I would like my peers to be familiar with the basics of Android				
	Complete Android "Hello World" tutorial	Kalena, Christina	2/person	y
As a developer or user I would like an android activity of the game board with a simple background				
	Get player icons around game-table	Christina	5	y
	Create activity to show game board	Eric	2	y
	Create graphic artwork for new game table from scratch, add to existing project, modify and commit once altered to fit correctly.	Kalena	5	
	Create graphic for front of cards and place on top of table graphic in project.	Kalena	2	
	Modify game.xml layout of players around table.	Kalena	1	
	Make game table with circular layout so that player icons shift according to number of players.	Christina	7	
	Get different pictures to show up on different player icons	Christina	5	
As a developer I must setup my development environment				
	Setup environment on lab machines on individual accounts for android development.	Group	1	
	Install Ubuntu, eclipse, & Android SDK and setup emulation	Kalena	8	y
	Install Android SDK and setup emulation	Christina	4	y
	Complete tutorials on vim, because other developers have found it so useful.	Kalena	1	
As a developer I want to 1-click build the android client so I can speed up development time (./iterate run)				
	Look into how phone-gap is able to build android in one line from bash	James	3	y
	Add emulate commands	James	4	y
	Add build, install and default commands	James	1	y
As a developer I want to design a client server architecture so I can build multiple clients (fat-server as it's a long test cycle on android clients)				
	Get client and server connected using sockets	James	8	y

Team 3 - Cards Against Humanity Mobile Game - Sprint Log for February 25th

User Story	Sprint Task	Owner(s)	Initial Est. (Hours)	Complete
			125	Y/N
	Get client and server exchanging data through JSON	James, Eric	8	y
	As a user I want to play with friends next to me so I can enjoy the game true to it's original form	To be merged		
As a user I want each user to be able to have different character pictures for each user around the table.				
	Create or find pictures for each user.	Kalena	4 to 8?	
As a developer I want the application to handle action events: scroll over cards, select card; scroll through my cards easily so I can see what I have in my hand fast				
	Create cards as a custom Android view class.	Eric	3	y
	Make view to allow players to select/play cards.	Eric	8	y
	Make cards able to be added or removed from game dynamically	Eric	2	y
	Make card user interface interact with game logic	Eric	3	
As a developer I want to use Gestalt's Principles and other human factors engineering techniques to layout/design the interface.				
	Add shading to table to add depth to table.	Kalena	1	
	Shading along edges of cards on table to add dimension.	Kalena	1	
	Players placed around table in such a manner that helps you understand that they all are players of the game.	Kalena, Christina	1	
As a developer it might be an interesting test tool to be able to play with the computer				
	Work in progress	Everyone	?	
As a user I want to be able to create a new game/table				
	Design and implement table creating logic & codes	James	8	y
As a user I should be able to join an existing table				
	Design and implement table joining hash table & code checking	James	6	y
As a user I want a appealing GUI				
	Make everything a black and white theme	Everyone, group decisions	?	
As a user I would like to identify who is the current Zaar of the game (user currently asking the question) via name, image, or other entity				
	Work in progress - look into	Christina	?	
As a student I need to complete Product Design Document				
	Complete design document	Everyone	7	
As a student I need to complete the Product requirements document.				
	Draft Requirements Doc at a group meeting	Everyone	4	y
